

# ORACLE PROJECT PORTFOLIO MANAGEMENT INTEGRATION PACK FOR PRIMAVERA P6 AND ORACLE E-BUSINESS SUITE

THE FIRST TRUE ENTERPRISE PPM SOLUTION

FEATURES

- Create your projects in Primavera or Oracle EBS
- Choose your level of summarization or integrate all task details
- Integrate Financial Plans or Workplans
- Synchronize global resources and rates between applications
- Capture actual costs in Oracle and send to Primavera
- Configure synchronization to run when you choose

BENEFITS

- Flexible setup options allows you to match integration to your business needs
- Automated synchronization eliminates manual intervention
- Reduce project risk by having everyone using the same data
- Align project schedules with procurement schedules for greater cash flow management
- Support by Oracle means future proof upgrades
- Lower Total Cost of Ownership over time

*Leveraging Oracle’s Application Integration Architecture, the Oracle Project Portfolio Management Integration Pack for Primavera P6 and Oracle E-Business Suite brings together the first true Enterprise PPM solution. This pre-built integration combines Primavera’s best in class work management application with Oracle EBS’ best in class financial management solution in a configurable application designed to meet the unique requirements of your organization.*

**End-to-End Project Portfolio Management Business Process**

According to the Standish Group International, approximately 71% of all IT projects fail to meet expectations of time, cost, or quality. In addition, core PPM solutions have traditionally operated in silos separate from other key enterprise processes. The Oracle PPM Integration Pack for Primavera P6 and Oracle E-Business Suite removes the silos that separate traditional PPM and ERP systems while improving your project success rate. Now you can manage your full project lifecycles by aligning your back-office budgets and costs with project operations to ensure accurate forecasting of costs, resources and schedules.

The Process Integration Pack (PIP) is pre-built using process integration best practices. The PIP will provide enterprises with the foundation to support integrated project based business processes thus eliminating the need for duplicate data entry and lowering the chance of errors and the risk to your project.

**Leverage the Best That Oracle Projects Has To Offer**

By adding Primavera’s leading PPM solution to E-Business Suite Projects we have created a complete end-to-end project management solution including financial, resource and schedule management.

### Ultimate Flexibility of Data Integration

The Oracle PPM Integration Pack for Primavera P6 and Oracle E-Business Suite(EBS) has been designed to give you complete control over how and when your data is synchronized between the applications. By leveraging the technology of the AIA architecture we provide an intuitive and adaptable interface between Primavera P6 and Oracle EBS Project Costing and/or EBS Project Management. The level of detail transferred between the applications is configurable by you and determined by your specific business requirements. This ensures a timely and efficient transfer of information between the applications.

To further ensure data consistency between the applications the PIP will control which system serves as the master for data. Global information regarding resources and rates will be controlled by EBS Projects as well as all financial cost information. Primavera P6 will control the schedule and the resource assignments. This ensures that both systems are fully utilizing their strengths while leveraging the strength of the other application.

Another key feature in the Oracle PPM Integration Pack for Primavera P6 and Oracle E-Business Suite is the flexibility to choose where you want to create your projects. The PIP has provided the ability to create a project in either application and gather the relevant details to establish the project in the other application. This provides the ultimate flexibility in your business process to support your specific requirements.

Finally, the Oracle PPM Integration Pack for Primavera P6 and Oracle E-Business Suite provides you with options as to when you want to synchronize your data. Some projects may require more frequent updates due to higher visibility to the organization and others may not require synchronization but once a month. With the provided controls you will have the ability to schedule the frequency of when a project is synchronized so that your data is available when and where it is needed.

The screenshot displays the 'Integration Options' setup page with the following settings:

- Enable Integration
- Integrate:
  - Financial Structure
  - Workplan Structure
- Actual Cost: Project Performance Reporting (dropdown menu)
