

XENA - A Warrior for Configuration Control

Why do you need XENA Administrator in your Primavera Toolkit? Here's why!

- To help meet Sarbanes-Oxley internal controls requirements
- To monitor or audit multiple P6 databases for changes by responsible user
- To quickly & easily cleanup unused Activity Code Values
- To track user license usage & make it easy to stay within Oracle/Primavera license requirements
- To quickly setup new users with security & layouts
- To free-up locked P6 users with a button click
